

Website Design & Development Brief

Project: Fencing Huntsville AL

Domain: fencinghuntsvilleal.com

Project Goal

The primary goal of this website is **not simply to look attractive**. The website must become the **highest-ranking local fencing website in Huntsville, Alabama** by meeting Google's latest requirements for:

- Local SEO
- AI Overview optimization
- AEO (Answer Engine Optimization)
- GEO (Generative Engine Optimization)
- Core Web Vitals
- Google PageSpeed standards
- Semantic SEO
- Topical Authority
- User Experience (UX)
- High Conversion Rate Optimization (CRO)

Every design and development decision must support SEO performance and lead generation.

Primary Business Objective

The website should rank on the first page (Top 3 if possible) for every commercial fence-buying keyword in Huntsville and surrounding areas.

Examples include:

- Fence Company Huntsville AL
- Huntsville Fence Company
- Fence Contractor Huntsville AL
- Fence Installation Huntsville AL
- Fence Builders Huntsville AL
- Residential Fencing Huntsville
- Commercial Fencing Huntsville
- Wood Fence Installation
- Vinyl Fence Installation
- Aluminum Fence Company

- Chain Link Fence Company
 - Privacy Fence Installation
 - Fence Repair Huntsville
 - Gate Installation Huntsville
 - Automatic Gate Installation
 - Fence Financing
 - Fence Near Me
-

Website Philosophy

The website should be built like a local authority website, not a marketing brochure.

Google should immediately understand:

- What we do
 - Where we operate
 - Why we are trusted
 - Why we deserve to rank above competitors
-

Website Structure

Create a strong SEO silo architecture.

Homepage

Service Pages

Individual Service Pages

Educational Resource Center

Create a large learning center designed to build topical authority.

Categories include:

Buying Guides

Fence Costs

Permits

HOA Rules

Fence Maintenance

Materials

Fence Financing

Property Lines

Contractor Tips

Comparison Articles

FAQs

Success Criteria

The finished website should:

- Meet or exceed Google's Core Web Vitals.
- Achieve PageSpeed scores of 95+ on mobile and 98–100 on desktop.
- Follow Local SEO, AEO, GEO, EEAT, and Semantic SEO best practices.
- Be structured to support AI Overviews and future AI-powered search experiences.
- Be scalable for hundreds of service-area and educational pages.
- Maximize lead generation through strong UX and conversion-focused design.
- Provide a solid foundation for ranking on high-intent fencing keywords across Huntsville and North Alabama.
